

Vaccine USB

USB Virus Detection Tool with LED Indicator
for industrial computers

The Hagiwara Sys-Com “Vaccine USB” is a portable virus detection tool for hidden virus threats in Windows OS based industrial systems, such as:

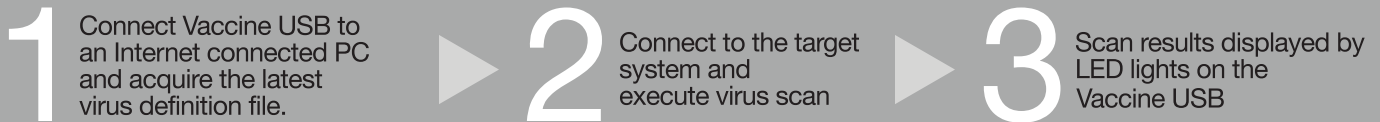

- Factory Production equipment
- Professional A/V equipment
- Test and Measurement devices
- Medical equipment

and other systems where installation of anti-virus software is difficult or limited.

Key Features:

- **Self Contained** - No software installation, no changes or modifications to target PC.
- **Easy to Manage** - Device setting, scan log and virus definition update software run from the Vaccine USB and any internet accessible PC can be used.
- **Scan on Demand** - No risk of system slowdowns. Scan when the time is right.
- **Auto-Run** - No keyboard or monitor required.
- **Easy to Understand Results** - Blue LED = Virus free, Red LED = Virus Detected
- **3 User Settings** - User can select from 3 different scan modes
- **Works with Windows XP Embedded OS**
- **Powered by McAfee** - scan engine and up-to-date virus definitions provided by McAfee

EASY AS 1-2-3!!

Versus installation type anti-virus software:

Installation type anti-virus software, which are effective at safeguarding office computers, have limitations from being deployed on the factory floor.

- Intermittent access to the internet, if any, prevents up-to-date virus definition and program version updates/
- Risk of system slowdowns due to real time virus monitoring
- Product warranties that restrict user installation of any non-manufacturer approved software and could void the warranty and possibly incur expensive fees to restore back to factory settings.

The Vaccine USB is designed to overcome these challenges.

Operating Environment	PC/AT compatible machine with USB interface* ¹ CD-ROM drive must be recognized* ² Physical memory: 128MB or more
Host Interface	USB 2.0 / 1.1
Operating Systems	Windows 7 32-bit * ³ Windows Vista (SP2) 32-bit Windows XP Service Pack 2, 3 Windows XP Embedded * ⁴ Windows 2000

*¹ Connection through USB extension board is not supported.

*² Autorun from CD-ROM drive must be enabled to launch the pre-loaded program automatically.

*³ 64-bit OS is not support. Availability on the service pack other than above will be announced once evaluation is complete.

*⁴ System information may not be acquired depending on the environment.
